G. L. H. GRAMMER, Secty. NEW JERSEY is safe for Cleveland and Thurman. If doubt has existed, the New-the nomination spoke in high praise of Pres

Thurman. It doubt ans existed, the New-ark election entirely dispels it. The full returns show Democratic gains along the whole line. A gain of two aldermen and the control of the school board would have been big glory, but a Democratic gain of the tensury surplus without disturbing the business and trade of the country. 2,000 votes settles the whole business so far as New Jersey is concerned. Newark is a large manufacturing centre and the Republicans beped for substantial gains on that issue. But it failed them there, as it will at many other equally unexpected points.

The country demands the provisions of the respective of the provisions of the sense and trade of the country.

Speaker Carlisle, in a letter to a member of the national committee, says of the Senate tariff bill that its decreases are effected by changing the existing classifications of dutiable goods, and in other cases they are effected by changing the duty from an advancem to a specific rate. In such - Four years ago the Republicans carried Newark by 1,500 majority. Now the Dem-

Up go the ling their bill so muddy as to be open to any tunity of making excursions to the woods a single man, aged 25 years, was oiling magnarantee for two years. THE campaign slander to the effect that Mr. Francis Cole, one of the Democratic

candidates for Assembly, is bestile to the soldier and soldier pensions, would be ridiculous if it were not so base. Those who know him need not be told that his every was thrown from his horse whilst outriding impulse is generous and just, and that he would be the last man to entertain the feeling now sought to be laid at his door. His house has long been noted for its broad hospitality, and to none more open than the bundreds of tired and foot-sore old soldiers

passing that way, who have stayed for days, and sometimes weeks, to rest and recuperate Surely no one of these could ever have dreamed that the good name of this true friend would in time become the foot-ball of unscrupulous political schemers-if not As to the slander, he desires it to be con tradicted in the most positive and unquali-

receive government pensions, and any measare to properly reward all Union soldiers would meet his hearty approval. At the same time, he would like to see the "border damages" paid, that justice might be done The authors or managers of this desnicable move are mistaken in the character of the

people of Adams county. Men of both parties are decided in their political feelings. but they are too fair and honest to see one of the most upright, generous, enterprising and useful citizens causelessly assailed and maligned, without their indiguant protest,

The number of factories and the capital engaged in the business increased rapidly. In a speech to a delegation of agriculturies on Tuesday General Harrison proved himself the peer of Blaine in the matter of falsely presenting the true purpose of the worst feature; the base deception of selling worst feature; the base deception of selling it through the representation that it was pure butter, whereby the farmer was defauled and the consumer imposed upon, was the principal reason why we "kicked." You will all remember how hard we farmers worked to have the eleomargatine law passed—the mentings we held, the time we gave to the matter and the large contributions we made from our purses. should doubtless feel constrained to inter-pose Executive dissent. But I do not feel called upon to interpret the motives of Con-gress otherwise than by the apparent char-acter of the bill which has been presented to me, and I am convinced that the taxes which it creates cannot possibly destroy the open and legitimate manufacture and sale of the thing upon which it is levied. If this article thing upon which its friends claim for it, and if the people of the land, with full knowledge of its real character, desire to purchase and use it, the taxes exacted by this bill will permit a fair profit to both manufacturer and seller. If the existence of the composity tuxed and the profits of its manufacture and sale depend upon the its manufacture and sale depend upon the disposing of it to the people for something else which it deceitfully imitates, the entire enterprise is a fraud and not an industry, and if it cannot endure the exhibition of its real character, which will be affected by the inspection, supervision and stamping which the bill directs, the sooner it is destroyed the better, in the interest of fair dealing.

"Such a result would not furnish the first instance in the history of legislation in which a revenue bill produced a benefit which was merely incidental to its main purpose. There is certainly no industry better entitled to the incidental advantages which may follow this legislation than our forming its manufacture and sale depend upon the

by the commission of seven murders within twelve months, two in one week lately, which bear every evidence of having been perpetrated by one and the same person. The victims were all women of dissolute habits. It would seem that they were steatchily approached from behind, seized by the head and throats cut from ear to ear. Not only this, but their bodies were horribly mutilated, in several cases completely disemboweled. No trace of the bratal murderer has been discovered. sideration.

"Nor should there be opposition to the incidental effect of this legislation on the part of those who profess to be engaged housestly and fairly in the manufacture and sale of a wholesome and valuable article of food, which, by its provisious, may be subject to taxation. As long as their business is carried on under cover and by false prederer has been discovered. An agent for a patent churn went to Ogglethorpe, Ga., recently and stopped at Col. Joe Baughn's to sell him one. The churn agent was informed that Mr. Baughn was cleaning out the well and if he wanted to see him he would have to go down. The agent got in the bucket and found the Col. at the bottom. Colonel Baughn bought the churn and signated the man at the top to draw the agent up and not to let any one else come down unless it was a lightning rod man. those whose manufactures, however vile and hurtful, take their places without challenge with the better sort in common crusade of deceit against the public. But as this occupation and its methods are forced into the light, and all these manufactures must either stand upon their merits or fall, the good and had must soon part company, and the fittest only will survive."

Trevious to the passage of this act, several State laws had been passed, but they were not effective. The oleomargatine manufacturers always succeeded in ovading them. If driven out of one State they settled in another. If driven out of one State they settled in another. Only the internal revenue machinery could afford the protection the farmer needed. Now the same method of supervision and accountability applies to bogus butter factories as to whiskey distilleries. This supervision has been so complete that no evasion of the law is possible willinout detection, and after detection follows speedy punishment. This product is branded for just what it is and to every yound is affixed a coupon stamp representing the revenue tax of fifteen cents.

Under the beneficent operation of this law the sales of the dairy farmers of the country increased \$25,000,000 in one year, and in the State of Pennsylvania alone, the difference was about \$2,000,000. pear at a glance, therefore, always face a difficulty.

We all remember the gloomy outlook for

the dairy farmer before the passage of the law. Why, didn't it look as though the manufacture of butter and cheese would

have to be given up if something was not done?

To whom belongs the cretit for this law? First and foremost, to the farmers themselves for their indemitable plack and courage in pushing the measure from its inception to its final passage by Congress; secondly and lastly, to President Cleveland who not only signed the act, but gave personal attention to its execution in his desire to benefit the farmers. "Yes," I hear my Republican neighbor say, "but how could the act have become a law had it not passed the Republican Senate? Don't the Republican Senate? TATE SPRINGS, TENN., July 4, 1882
The Swift Specific Co., Atlanta, Ga.:
Gentlemen—Seven years ago I contracted an exceedingly bad case of blood poison. I tried a physician, the best at command, but secured no benefit. My throat began to get sore, and my body covered with sores and ulcers. Going from bad to worse, I felt that my grave must be reached in the mear future. I gave up the doctors' treatment, and with a despairing hope I commenced taking your medicine. I began to improve from the first bottle, and in a short time the ulcers healed, and my skin cleared off and was entirely well.

One year ago a case of catarrh developed in my system. The physician did his best, but could not cure me; but two bottles of Swift's Specific gave me permanent relief.
